Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Davis et al (5,491,720).

Consider claims 1 and 8, Davis et al teach a data communication apparatus and method that exchanges a voice packet via an IP network, the voice packet storing non-voice data (col. 3 lines 18-32; it should be noted that telephone 30 is connected via the data network, thus implies the system utilized voice over data network (i.e., VoIP), the apparatus and method comprising: a data processor that executes a standard communication mode and a high-speed communication mode, the standard communication mode exchanging the voice packet at a predetermined transfer rate, the high-speed communication mode exchanging the voice packet at a rate faster than the predetermined transfer rate of the standard communication mode, the standard communication mode and the high-speed communication mode being interchangeably executed (abstract; col. 2 lines 9-16); an acceptor that obtains capability information of a receiver apparatus in accordance with a predetermined communication protocol (col. 3 lines 56-64; col. 4 line 18-22, lines 45-62); and a controller that selects the high-speed communication mode for execution when it is determined that the receiver apparatus has the high-speed communication

Art Unit: 2614

mode, from the capability information obtained by said acceptor (col. 3 lines 56-64; col. 4 line 18-22, lines 45-62).

Consider claim 2, Davis et al teach wherein said data processor comprising: an IP processor that decodes data in the received voice packet; and a modem that demodulates PCM data that is output from said IP processor (col. 1 lines 24-51).

Consider claim 6, Davis did not specifically disclosed wherein the communication protocol is Session Initiation Protocol. However, voice over data communications (VoIP) inherently utilized SIP.

Consider claim 7, Davis et al teach wherein the data stored in the voice packet is facsimile data (see Fig. 1).

Allowable Subject Matter

3. Claims 3-5 and 9-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
